

Digital Speech Processing - Homework #1

資工三 B05902118 陳盈如

1. Use the command **make** to compile all c programs and use **make clean** to clean up all executive files.
2. I set the iteration to be 2100 and get “model_01~05.txt” from “model_init.txt”. Then, use “model_01~05.txt” to test “testing_data1~2.txt” and get “result1~2.txt”. Besides, the accuracy is written in “acc.txt”.
3. My highest accuracy is 0.864400.
4. When the iteration reaches a certain the number, the accuracy will be the highest. However, when I increase the iteration, the accuracy will decrease.
